Project Name	Project - SKILL AND JOB RECOMMENDER
Maximum Marks	2 Marks

Customer Problem Statement Template:

Having lots of skills but wondering which job will best suit you? Don't need to worry! We have come up with a skill recommender solution through which the fresher or the skilled person can log in and find the jobs by using the search option or they can directly interact with the chatbot and get their dream job.

To develop an end-to-end web application capable of displaying the current job openings based on the user skillset. The user and their information are stored in the Database. An alert is sent when there is an opening based on the user skillset. Users will interact with the chatbot and can get the recommendations based on their skills. We can use a job search API to get the current job openings in the market which will fetch the data directly from the webpage.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Needed for a job	Get a job	Not opportunity	Mainly needed a job	Happy to the chore
PS-2	To recruit	Give a job	Ratings needed	To hire people	Immense pleasure to the soul.
