Project Design Phase-I
Proposed Solution

Date	03 October 2022
Team ID	PNT2022TMID04977
Project Name	SKILL AND JOB RECOMMENDER
Maximum Marks	2 Marks

Proposed Solution:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	To provide jobs to job seekers using cloud application development.
2.	Idea / Solution description	- User provides tags along with his details. - The tags represents the user's skillsets - The job provider searches their feature employees based on the skill tags attached to the job seeker profile.
3.	Novelty / Uniqueness	Usage of tag to find as well as representing skillsets. The skillset tag is the one common parameter that helps provider and seeker to find each other
4.	Social Impact / Customer Satisfaction	Upon implementing customers feel: 1. Job seeker Satisfaction, 2. Job provider satisfaction, 3. Easy communication among seeker and provider.
5.	Business Model (Revenue Model)	- Key Partners are Third-party applications companies and users. - Activities held as user Service, System Maintenance. - Key Resources support Engineers, Multi-channel. - User Relationship have 24/7 Email Support, Knowledge-based channel.

6.	Scalability of the Solution	• The real goal of scaling user service is providing an platform that will allow many user to the same skillset tags. • An environment where they will be able to spend less time on work and more time on resolving critical provider and seeker issues.
